

Contents

Chapter 1 - The basic components of a computer system.....	3
Chapter 2 - More about systems software	7
Chapter 3 - Different types of user interface	12
Chapter 4 - Input and output devices.....	23
Chapter 5 - Bits, nibbles, bytes and codes.....	29
Chapter 6 - Storage devices.....	34
Chapter 7 - An introduction to program design.....	37
Chapter 8 - Programming constructs	42
Chapter 9 - Procedures and functions	46
Chapter 10 - An introduction to recursion.....	51
Chapter 11 - More about translation.....	53
Chapter 12 - Testing your programs and quality control.....	55
Chapter 13 - Denary, binary, octal, hex and BCD.	61
Chapter 14 - Negative binary numbers	68
Chapter 15 - Binary arithmetic.....	71
Chapter 16 - Storing data and records	75
Chapter 17 - Arrays.....	81
Chapter 18 - Linked lists.....	84
Chapter 19 - Queues and stacks	88
Chapter 20 - Binary trees	94
Chapter 21 - File organisation.....	100
Chapter 22 - Backing up data verses archiving data	107
Chapter 23 - The CPU in more detail	109
Chapter 24 - Memory.....	113
Chapter 25 - Using buffers and interrupts to transfer data	116
Chapter 26 - An introduction to batch processing	118
Chapter 27 - An introduction to real-time processing.....	124
Chapter 28 - File formats	126
Chapter 29 - File management	132
Chapter 30 - An introduction to networks.....	134
Chapter 31 - Data communications.....	140
Chapter 32 - Systems Development Life Cycle	151
Chapter 33 - Common applications	167
Chapter 34 - Information systems.....	173
Chapter 35 - The implications of using computers.....	178
Chapter 36 - Operating systems in detail	186
Chapter 37 - Translation in detail	198
Chapter 38 - Computer architecture and the FDE cycle	204
Chapter 39 - Floating-point numbers	210
Chapter 40 - More on linked lists	220

Chapter 41 - Passing parameters using the stack.....	226
Chapter 42 - Searching and sorting files	228
Chapter 43 - History of programming paradigms	240
Chapter 44 - Jackson Structured Programming (JSP).....	243
Chapter 45 - Object oriented programming	248
Chapter 46 - Declarative programming.....	258
Chapter 47 - Low-level languages	262
Chapter 48 - BNF and syntax diagrams	265
Chapter 49 - An introduction to database design	269
Chapter 50 - Normalisation	275
Chapter 51 - Entity Relationship diagrams.....	283
Chapter 52 - An introduction to Entity Life Histories (ELH).....	289
Chapter 53 - More about databases.....	291
Chapter 54 - Querying a database	295
Chapter 55 - Network systems	299
Chapter 56 - Simulation	308
Chapter 57 - More about real-time applications	311
Chapter 58 - Robots.....	315
Chapter 59 - Embedded systems.....	317
Chapter 60 - Nomadic networks	319
Chapter 61 - The Internet.....	322
Chapter 62 - Security of data	327
Chapter 63 - Distributed databases.....	329
Chapter 64 - Project management.....	331
Chapter 65 - Specifying a computer system	341
Chapter 66 - E-commerce	343
Chapter 67 - The value of data	345
Chapter 68 - Work patterns and training	348
Index	350
